

What is our Planet made of?

Last month, DAM launched the MAGMA coffee table at the Maison & Objet in Paris.

With a unique beauty, the MAGMA coffee table refers to the molten and semi-molten mineral substances found under the Earth's crust. Composed of a semi-sphere of agglomerated dark cork that evokes the earth's crust, MAGMA features a highly polished stone top with intense and expressive veins. This surface portrays **a peculiar narrative about the beauty of our planet, dynamic yet deeply fragile, highlighting what is important to care for and preserve - Nature.**

The coffee table is available in two sizes that combine with the option of a turned wooden beam base that elevates the semi-sphere, in an ode to our Planet.

Let's boost conscious attitudes, creating more sustainable spaces!
